TRANSIT SHELTER COVERAGE

TRANSIT SHELTERS

Transit shelter display panels serve as curbside billboards showcasing advertisers' messaging in backlit, glass mounted frames. Transit shelters provide 24hour visibility to vehicular and pedestrian traffic at high circulation locations, usually along main arteries of metropolitan markets.

Transit shelter ads are primarily used to reach metropolitan audiences for both national and local advertisers. The street-level shelter posters can be purchased and rotated throughout the market or by selective locations to reach specific target groups. Transit shelters are effective for multiple uses, including point-of-purchase, directional, residential coverage, ethnic or hyper-local marketing.
